No. R. 527

23 April 2004

MINERAL AND PETROLEUM RESOURCES DEVELOPMENT ACT, 2002 (Act No. 28 of 2002):
MINERAL AND PETROLEUM RESOURCES DEVELOPMENT REGULATIONS

The Minister of Minerals and Energy has, under section 107(1) of the Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002), read with the provisions of section 14 of the Interpretation Act, 1957 (Act No. 33 of 1957) made the regulations in the Schedule.
SCHEDULE

ARRANGEMENT

CHAPTER 1

Short title
1. Definitions

CHAPTER 2

MINERAL AND PETROLEUM, SOCIAL AND ENVIRONMENTAL REGULATIONS

PART I: MINERAL AND PETROLEUM REGULATION

2. Manner of lodging application and plan
3. Consultation with interested and affected persons
4. Application for reconnaissance permission
5. Application for prospecting right
6. Terms and conditions of prospecting right
7. Prospecting work programme
8. Progress report in respect of prospecting
9. Application for renewal of prospecting right
10. Application for mining right
11. Mining work programme
12. Terms and conditions for mining right
13. Application for renewal of mining right
14. Application for mining permit
15. Monthly returns with respect to mining or processing of minerals
16. Application for retention permit
17. Application for renewal of retention permit
18. Application for reconnaissance permit
19. Terms and conditions for reconnaissance permit
20. Reconnaissance work programme
21. Report in respect of reconnaissance activities
22. Supply of data in respect of reconnaissance
23. Application for technical co-operation permit
24. Terms and conditions for technical co-operation permit
25. Technical co-operation work programme
26. Report in respect of technical co-operation activities
27. Supply of data in respect of technical co-operation activities
28. Application for exploration right
29. Terms and conditions for exploration right
30. Exploration work programme
31. Reports in respect of exploration
32. Supply of data in respect of exploration
33. Application for renewal of exploration right
34. Application for production right
35. Terms and conditions for production right
36. Production work programme
37. Supply of data in respect of production
38. Application for renewal of production right
39. Regional Mining Development and Environmental Committees

PART II: SOCIAL AND LABOUR PLAN

40. Application of provisions
41. Objectives of social and labour plan
42. Submission of social and labour plan
43. Applicability of social and labour plan
44. Amendment of social and labour plan
45. Reporting of social and labour plan
PART III: ENVIRONMENTAL REGULATIONS FOR MINERAL DEVELOPMENT, PETROLEUM EXPLORATION AND PRODUCTION
AND PRODUCTION

46. Contents of social and labour plan

PART III:

47. Application of provisions
48. Environmental reports to be compiled for application of mining right
49. Contents of scoping report
50. Contents of environmental impact assessment report
51. Environmental management programme
52. Environmental management plan
53. Methods for financial provision
54. Quantum of financial provision
55. Monitoring and performance assessments of environmental management programme or environmental management plan
56. Principles for mine closure
57. Application for closure certificate
58. Application to transfer environmental liabilities to competent person
59. Qualifications of person regarding transfer of environmental liabilities and responsibilities
60. Environmental risk report
61. Closure objectives
62. Contents of closure plan

PART IV: POLLUTION CONTROL AND WASTE MANAGEMENT REGULATION

63. Principles of pollution control and waste management
64. Air quality management and control
65. Fire prevention
66. Noise management and control
67. Blasting, vibration and shock management and control
68. Water management and pollution control
69. Disposal of waste material
70. Soil pollution and erosion control
71. Sanitation of surface
72. Granite off-cuts and related waste
73. Management of residue stockpiles and deposits

CHAPTER 3
APPEALS

74. Appeal against administrative decisions

CHAPTER 4
GENERAL AND MISCELLANEOUS REGULATIONS

75. Application fees for permissions, permits, rights and appeals
76. Prospecting fees
77. Retention fees

CHAPTER 5
TRANSITIONAL ARRANGEMENTS

78. Lodgement of old order prospecting right listed in Table 1 of Schedule II of the Act for conversion
79. Lodgement of old order mining right listed in Table 2 of Schedule II of the Act for conversion
80. Application of transitional arrangements to OP26 right and OP26 mining lease pertaining to petroleum exploration and production
81. Affidavit forms
82. Conversion fees
83. Forms
ANNEXURE I

APPLICATION FORMS FOR PERMISSIONS, RIGHTS AND PERMITS TO BE COMPLETED IN TERMS OF THE MINERAL AND PETROLEUM RESOURCES DEVELOPMENT ACT, 2002

Form A: Application form for a reconnaissance permission in terms of Section 13 of the Act, 2002
Form B: Application form for a prospecting right in terms of Section 16 of the Act, 2002
Form C: Application form for the renewal of a prospecting right in terms of Section 18 of the Act, 2002
Form D: Application form for a mining right in terms of Section 22 of the Act, 2002
Form E: Application form for the renewal of a mining right in terms of Section 24 of the Act, 2002
Form F: Application form for a mining permit in terms of Section 27(2) of the Act, 2002
Form G: Application form for a retention permit in terms of Section 31 of the Act, 2002
Form H: Application for the renewal of retention permit in terms of Section 34 of the Act, 2002
Form I: Lodgment form for the conversion of an old order prospecting right listed in Table 1 of Schedule II of the Act, 2002 for conversion
Form J: Lodgment form for the conversion of an old order mining right listed in Table 2 of Schedule II of the Act, 2002 for conversion
Form K: Application form for a reconnaissance permit in terms of Section 74 of the Act, 2002
Form L: Application form for a technical co-operation permit in terms of Section 76 of the Act, 2002
Form M: Application form for an exploration right in terms of Section 79 and the renewal thereof in terms of Section 81 of the Act, 2002
Form N: Application form for a production right in terms of Section 83 and the renewal thereof in terms of Section 85 of the Act, 2002

ANNEXURE II

MISCELLANEOUS PROCEDURES

Form O: Application to transfer environmental liabilities and responsibilities to competent person in terms of section 43(2) of the Act, 2002
Form P: Application for closure certificate in terms of Section 43(3) of the Act
Form Q: Form to be completed in terms of regulation 46(b)(i)(aa) of the Social and Labour Plan to report the number and education levels of employees
Form R: Form to be completed in terms of regulation 46(b)(i)(bb) of the Social and Labour Plan to report the number of vacancies that the mining operation has been unable to fill for a period longer than 12 months
Form S: Form to be completed in terms of regulation 46(b)(v) of the Social and Labour Plan to report employment equity statistics
Form T: Form to be completed in terms of regulation 46(c)(vi) of the Social and Labour Plan to report the procurement progression plan and its implementation for HDSA
Form U: Affidavit in respect of the continuation of exploration operations in terms of Schedule II; item 4(2)(h) of the Act, 2002
Form V: Affidavit in respect of the continuation of production operations in terms of Schedule II; item 5(2)(e) of the Act, 2002
Form W: Affidavit in respect of the continuation of an old order prospecting right in terms of Schedule II; item 6(2)(h) of the Act
Form X: Affidavit in respect of the continuation of an old order mining right in terms of Schedule II; item 7(2)(d) of the Act
CHAPTER 1

SHORT TITLE

These Regulations shall be called the Mineral and Petroleum Resources Development Regulations.

DEFINITIONS

1. In this Schedule any word or expression to which a meaning has been assigned in the Act shall have that meaning and, unless the context indicates otherwise-

“closure certificate” means a closure certificate issued in terms of section 43 of the Act;

“competent person” means a person who –
(i) is qualified by virtue of his or her knowledge, expertise, qualifications, skills and experience; and
(ii) is familiar with the provisions of the Act and other related legislation; and
(iii) has been trained to recognise any potential or actual problem in the performance of the work;

“environmental impact assessment” means an assessment as contemplated in section 39(1) of the Act;

“form” means a document or standard form attached to the regulations as Annexures I and II;

“designated agency” means the agency designated by the Minister in terms of section 70 of the Act;

“interested and affected person” means a natural or juristic person or an association of persons with a direct interest in the proposed or existing operation or who may be affected by the proposed or existing operation;

“latent environmental impact” means any environmental impact that may result from natural events or disasters after a closure certificate has been issued;

“produced water” means water produced with petroleum from the sub-surface in the course of exploration or production operations, and separated from the petroleum with the intention of discharging it into the environment;

“residual environmental impact” means the environmental impact remaining after a closure certificate has been issued;

CHAPTER 2

MINERAL AND PETROLEUM, SOCIAL AND ENVIRONMENTAL REGULATIONS

PART 1: MINERAL AND PETROLEUM REGULATION

Manner of lodging application and plan

2. (1) An application for any permission, right or permit made in terms of the Act must be lodged by submitting an appropriate completed form contained in Annexure I by hand or registered post to the Regional Manager in whose region the land is situated or to the designated agency, as the case may be, at the relevant address specified in the appropriate form.

(2) An application contemplated in subregulation (1) must be accompanied by a plan of the land to which the application relates, in accordance with generally accepted standards, signed and dated by the applicant and must contain –

(a) the co-ordinates and spheroid (Clarke 1880/Cape Datum, WGS84/WGS84, WGS94/Hartebeesthoek94) of the land to which the application relates;
(b) the north point;
(c) the scale to which the plan has been drawn;
(d) the location and where applicable, the name and number of the land to which the application relates;
(e) the extent of the land to which the application relates;
(f) the boundaries of the land to which the application relates;
(g) surface structures and registered servitudes where applicable; and
(h) the topography of the land to which the application relates.

(3) In the case of an application for a mining permit in terms of section 27 of the Act, the applicant may be exempted from the requirements in subregulation (2)(a) and (2)(h) upon lodgement of such application.

Consultation with interested and affected persons

3. (1) The Regional Manager or designated agency, as the case may be, must make known by way of a notice, that an application contemplated in regulation 2, has been accepted in respect of the land or offshore area, as the case may be.

(2) The notice referred to in subregulation (1) must be placed on a notice board at the office of the Regional Manager or designated agency, as the case may be, that is accessible to the public.

(3) In addition to the notice referred to in subregulation (1), the Regional Manager or designated agency, as the case may be, must also make known the application by at least one of the following methods -

(a) publication in the applicable Provincial Gazette;
(b) notice in the Magistrate’s Court in the magisterial district applicable to the land in question; or
(c) advertisement in a local or national newspaper circulating in the area where the land or offshore area to which the application relates, is situated.

(4) A publication, notice or advertisement referred to in subregulation (3) must include-

(a) an invitation to members of the public to submit comments in writing on or before a date specified in the publication, notice or advertisement, which date may not be earlier than 30 days from the date of such publication, notice or advertisement;
(b) the name and official title of the person to whom any comments must be sent or delivered; and
(c) the -

(i) work, postal and street address and, if available, an electronic mail address;
(ii) work telephone number; and
(iii) facsimile number, if any, of the person contemplated in paragraph (b).

Application for reconnaissance permission

4. (1) An application for a reconnaissance permission in terms of section 13 of the Act must be completed in the form of Form A contained in Annexure I, and must contain -
(a) the full particulars of the applicant;

(b) in the case of a company or closed corporation, documentary proof that the applicant has obtained the necessary authority to make the application in a representative capacity on behalf of the company or closed corporation, as the case may be;

(c) the plan, contemplated in regulation 2(2);

(d) the registered description of the land to which the application relates, specifying the farm name or names;

(e) documentary proof of the applicant’s financial ability or access thereto which may include but is not limited to the following:
   (i) An approved budget for the proposed reconnaissance operation;
   (ii) loan agreements entered into for the proposed reconnaissance operation;
   (iii) a resolution by a company to provide for the finances required for the proposed reconnaissance operation; and
   (iv) any other mechanism or scheme providing for the necessary finances for the proposed reconnaissance operation;

(f) documentary proof of the applicant’s technical ability or access thereto to conduct the proposed reconnaissance operation in accordance with the reconnaissance work programme;

(g) a reconnaissance work programme for the duration of the proposed reconnaissance operation; and

(h) the estimated expenditure regarding the proposed reconnaissance operation.

(2) The application must be lodged together with the application fee specified in regulation 75(1)(a).

Application for prospecting right

5. (1) An application for a prospecting right in terms of section 16 of the Act must be completed in the form of Form B contained in Annexure I, and must contain-

(a) the full particulars of the applicant;

(b) in the case of a company or closed corporation, documentary proof that the applicant has obtained the necessary authority to make the application in a representative capacity on behalf of the company or closed corporation, as the case may be;

(c) the plan, contemplated in regulation 2(2) to which the application relates;

(d) the registered description of the land to which the application relates, specifying the farm name and subdivision;

(e) an indication of the mineral or minerals for which the prospecting right is required;

(f) the period for which the prospecting right is required;

(g) a prospecting work programme contemplated in regulation 7 including estimated annual expenditure for each phase of the prospecting operations;

(h) documentary proof of the applicant’s technical ability or access thereto to —
   (i) conduct the proposed prospecting operation in accordance with the prospecting work programme; and
(ii) to mitigate, manage and rehabilitate relevant environmental impacts;
(iii) comply with relevant provisions of the Mine Health and Safety Act, 1996 (Act No. 29 of 1996);

(i) a description of how the applicant's technical ability will be provided by making use of in-house expertise, contractors and consultants on the proposed prospecting operation;

(j) a budget and documentary proof of the applicant's financial ability or access thereto, which may include but is not limited to the following:
(i) Loan agreements entered into for the proposed prospecting operation;
(ii) a resolution by a company to provide for the finances required for the proposed prospecting operation; and
(iii) any other mechanism or scheme providing for the necessary finances for the proposed prospecting operation;

(k) a list of existing rights and permits held by the applicant compiled in table format which indicates the region, the location with regard to the land name and the existing right or permit number for each mineral;

(l) certified copy or copies of the title deed or deeds, where applicable, in respect of the land to which the application relates; and

(m) any other specific or additional information, data or documentation which the Minister may request in connection with the information submitted in terms of paragraphs (a) to (l).

(2) The application must be lodged together with the application fee specified in regulation 75 (1)(b).

Terms and conditions of prospecting right

6. The terms and conditions of a prospecting right agreed upon will be approved by the Minister.

Prospecting work programme

7. (1) The prospecting work programme must contain -

(a) the full particulars of the applicant;
(b) the plan contemplated in regulation 2(2), showing the land to which the application relates;
(c) the registered description of the land to which the application relates specifying the farm name and subdivision;
(d) the mineral or minerals to be prospected for;
(e) a geological description of the land substantiated by a geological map;
(f) a description of how the mineral resource and mineral distribution of the prospecting area will be determined through -
(i) the prospecting work to be performed;
(ii) a geochemical survey to be carried out; and
(iii) a geophysical survey to be undertaken;
(g) a description of the prospecting method or methods to be implemented that may include -
(i) any excavations, trenching, pitting and drilling to be carried out;
(ii) any bulk sampling and testing to be carried out; and
(iii) any other prospecting methods to be applied;
(h) All planned prospecting activities must be conducted in phases and within specific timeframes.
(i) technical data detailing the prospecting method or methods to be implemented and the time required for each phase of the proposed prospecting operation;

(j) details with documentary proof of -
   (i) the applicant's technical ability or access thereto to conduct the proposed prospecting operation; and
   (ii) a budget and documentary proof of the applicant's financial ability or access thereto, which may include but is not limited to the following:
      (aa) Loan agreements entered into for the proposed prospecting operation;
      (bb) resolution by a company to provide for the finances required for the proposed prospecting operation; and
      (cc) any other mechanism or scheme providing for the necessary finances for the proposed prospecting operation;

(k) a cost estimate of the expenditure to be incurred for each phase of the proposed prospecting operation where the expenditure must be broken down into -
   (i) direct prospecting costs;
   (ii) labour costs;
   (iii) costs pertaining to the rehabilitation and management of environmental impacts; and
   (iv) any other direct cost; and

(m) an undertaking, signed by the applicant, to adhere to the proposals as set out in the prospecting work programme.

(2) The prospecting work programme referred to in subregulation (1) shall form part of the prospecting right when such right is granted.

Progress report in respect of prospecting

8. (1) Every 12 months from the date of the granting of a prospecting right, or at the end of the period of the prospecting right if the period of prospecting is less than 12 months, the holder of a prospecting right must submit, within 30 days of the expiry of such period, progress reports contemplated in section 21(1)(b) of the Act, to the Regional Manager regarding the prospecting operation.

(2) The progress report contemplated in subregulation (1) must contain the following:

(a) Details of the prospecting operations conducted during the reporting period;

(b) a surface plan which corresponds with the plan contemplated in regulation 2(2), of the prospecting area, the location, extent and depth of all boreholes, trenches or excavations completed;

(c) the lithology, mineral content and mineral distribution identified in those boreholes, trenches or excavations;

(d) any geological or pre-feasibility reports, or any geological and pre-feasibility reports, completed on the mineral or minerals obtained from the excavation, trench or borehole or a brief summary statement of the results;

(e) actual expenditure incurred in respect of the prospecting area and the basis on which it was calculated;

(f) details with regard to the execution and compliance with the approved environmental management plan;

(g) prospecting operations that will be conducted during the next reporting period in accordance with the prospecting work programme;

(h) any other relevant information obtained by the holder of a prospecting right regarding the prospecting operations; and
any additional information regarding the prospecting operations, requested by the Minister.

(3) If prospecting methods other than boreholes, trenches or excavations are utilized, the following information is required in the progress report:

(a) Full details of any geophysical surveys conducted, including:
   (i) the flight plans or surface plans showing all flight lines or traverse lines; and
   (ii) any data in writing or digital format gathered during those surveys.

(b) full details of any geochemical surveys conducted, including:
    (i) the surface plans showing all sample points;
    (ii) the details of all analysis carried out on those samples; and
    (iii) the full analytical results of all those samples; and

(c) the full results of any other investigations or tests performed, including locations of any other samples and bulk samples collected, including, where applicable:
    (i) the petrographic descriptions of thin sections;
    (ii) the full information and analytical results of any age determinations;
    (iii) the full results of any physical properties determined;
    (iv) the full results of any chemical analysis performed;
    (v) the full results of any sedimentological investigations; and
    (vi) the full results of any other tests or procedures performed.

(4) Certified copies of any geological maps or plans produced during the prospecting operation must be included in the progress report.

(5) The holder of a prospecting right must supply the Regional Manager concerned with a list of borehole core information generated during any drilling programme.

(6) The holder contemplated in subregulation (5) must obtain written permission from the Regional Manager to destroy any residual borehole core.

Application for renewal of prospecting right

9. (1) An application for the renewal of a prospecting right in terms of section 18(1) of the Act must be completed in the form of Form C contained in Annexure I, and must be accompanied by the information requested therein.

(2) The application for the renewal of a prospecting right must be lodged together with the application fee specified in regulation 75(1)(b).

Application for mining right

10. (1) An application for a mining right in terms of section 22(1) of the Act must be completed in the form of Form D contained in Annexure I and must contain:

    (a) the full particulars of the applicant;
    (b) in the case of a company or closed corporation, documentary proof that the applicant has obtained the necessary authority to make the application in a representative capacity on behalf of the company or closed corporation, as the case may be;
    (c) a plan contemplated in regulation 2(2) showing the land and mining area to which the application relates;
    (d) the mineral or minerals for which the right is required;
    (e) the period for which the right is required;
    (f) a mining work programme contemplated in regulation 11;
    (g) a social and labour plan contemplated in regulation 46;
(h) detailed documentary proof of the applicant's technical ability or access thereto to conduct the mining activities and to mitigate and rehabilitate relevant environmental impacts;

(i) documentary proof that the applicant has the ability to comply with relevant provisions of the Mine Health and Safety Act, 1996 (Act No. 29 of 1996);

(j) a description of how the applicant's technical ability will be provided by making use of in-house expertise, contractors and consultants on the proposed mining operation;

(k) budget and documentary proof of the applicant's financial ability or access thereto, which may include but is not limited to the following:
   (i) Loan agreements entered into for the proposed mining operation;
   (ii) a resolution by a company to provide for the finances required for the proposed mining operation; and
   (iii) any other mechanism or scheme providing for the necessary finances for the proposed mining operation.

(l) a list of existing rights or a list of existing rights and permits, as the case may be held by the applicant, to be compiled in a table format that indicates the region and location with regard to the land name and the existing right or permit number for each mineral within the Republic; and

(m) a certified copy or copies of the title deed or deeds, where applicable, in respect of the land to which the application relates; and

(n) any other specific and additional information, data or documentation that the Minister may request in connection with the information submitted under paragraphs (a) to (m).

(2) The application for a mining right must be lodged together with the application fee specified in regulation 75(1)(c).

Mining work programme

11. (1) A mining work programme must contain -

(a) the full particulars of the applicant;

(b) a plan contemplated in regulation 2(2), showing the land and mining area to which the application relates;

(c) a registered description of the land or area to which the application relates;

(d) the details of the identified mineral deposit concerned with regard to the type of mineral or minerals to be mined, its locality, extent, depth, geological structure, mineral content and mineral distribution;

(e) the details of the market for, the market's requirements and pricing in respect of the mineral concerned;

(f) the details with regard to the applicable timeframes and scheduling of the various implementation phases of the proposed mining operation, and a technically justified estimate of the period required for the mining of the mineral deposit concerned;

(g) a financing plan that must contain -
   (i) the details and costing of the mining technique, mining technology and production rates applicable to the proposed mining operation
   (ii) the details and costing of the technological process applicable to the extraction and preparation of the mineral or minerals to comply with market requirements;
   (iii) the details and costing of the technical skills and expertise and associated labour implications required to conduct the proposed mining operation;
(iv) the details and costing of regulatory requirements in terms of the Act and other applicable law, relevant to the proposed mining operation;

(v) the details regarding other relevant costing, capital expenditure requirements, and expected revenue applicable to the proposed mining operation;

(vi) a detailed cash flow forecast and valuation, excluding financing of the proposed mining operation, which forecast must clearly indicate how the applicable regulatory costs will be accommodated therein;

(vii) the details regarding the applicant's resources or proposed mechanisms to finance the proposed mining operation, and details regarding the impact of such financing arrangements on the cash flow forecast; and

(viii) provisions for the execution of the social and labour plan.

(h) an undertaking, signed by the applicant, to adhere to the proposals as set out in the mining work programme.

(2) The mining work programme contemplated in subregulation (1) shall form part of the mining right where such right is granted.

Terms and conditions of mining right

12. The terms and conditions of a mining right agreed upon will be approved by the Minister.

Application for renewal of mining right

13. (1) An application for the renewal of a mining right in terms of section 24(1) of the Act must be completed in the form of Form E contained in Annexure I, and must be accompanied by the information requested therein.

(2) The application for a renewal of a mining right must be lodged together with the application fee specified in regulation 75(1)(c).

Application for mining permit

14. (1) An application for a mining permit in terms of section 27 of the Act must be completed in the form of Form F contained in Annexure I, and must be accompanied by the information requested therein.

(2) The application for a mining permit must be lodged together with the application fee specified in regulation 75(1)(d).

Monthly returns with respect to mining or processing of minerals

15. Monthly returns contemplated in section 28(2)(a) of the Act, must reach the Director-General not later than the fifteenth day of the month following the month in respect of which it is reported and must be forwarded as set out in forms to be provided by the Department for that purpose.

Application for retention permit

16. (1) An application for a retention permit in terms of section 31(1) of the Act must be completed in the form of Form G contained in Annexure I, and must be accompanied by the information requested therein.

(2) The application for a retention permit must be lodged together with the application fee specified in regulation 75(1)(e).

Application for renewal of retention permit

17. (1) An application for renewal of a retention permit in terms of section 34(1) of the Act, must be completed in the form of Form H contained in Annexure I.

(2) The application for a renewal of a retention permit must be lodged together with the application fee specified in regulation 75(1)(e).
Application for reconnaissance permit

18.  (1) An application for a reconnaissance permit in terms of section 74 of the Act must be completed in the form of Form K contained in Annexure I, and must be lodged at the office of the designated agency.

(2) The application contemplated in subregulation (1) must contain -

(a) the full particulars of the applicant;

(b) in the case of a company or closed corporation, documentary proof that the applicant has obtained the necessary authority to make the application in a representative capacity on behalf of the company or closed corporation, as the case may be;

(c) a plan contemplated in regulation 2(2), showing the land, area or offshore area to which the application relates;

(d) a registered description of the area to which the application relates;

(e) a clear statement of the technical motivation;

(f) the period for which the permit is required;

(g) a reconnaissance work programme contemplated in regulation 20 with estimated expenditure during the reconnaissance operations;

(h) documentary proof of the applicant's technical ability or access thereto to enable the applicant to conduct the proposed reconnaissance survey and to mitigate and rehabilitate relevant environmental impacts;

(i) a description of how the applicant's technical ability will be provided by making use of in-house expertise, contractors and consultants on the proposed reconnaissance operation;

(j) a budget and documentary proof of the applicant's financial ability or access thereto which may include but is not limited to the following:

(i) Loan agreements entered into for the proposed reconnaissance operation;

(ii) resolution by a company to provide for the finances required for the proposed reconnaissance operation; and

(iii) any other mechanism or scheme providing for the necessary finances for the proposed reconnaissance operation.

(k) a list of existing rights and permits held by the applicant to be compiled in a table format that indicates the location with regard to the land name or offshore area and the existing right or permit number for petroleum exploration or production;

(l) certified copy or copies of the title deed or deeds, where applicable, in respect of the land to which the application relates;

(m) any other information, data or documentation that the Minister may require in connection with information required under paragraphs (a) to (k).

(3) The application must be lodged together with the application fee specified in regulation 75(2)(a).

Terms and conditions for reconnaissance permit

19. The terms and conditions of a reconnaissance permit agreed upon will be approved by the Minister.

Reconnaissance work programme

20.  (1) A reconnaissance work programme must contain -
(a) a description of the mineral or minerals for which reconnaissance operations shall be undertaken;

(b) an outline of the geological, geochemical, geophysical and other work to be performed;

(c) technical data detailing the reconnaissance method or methods to be implemented for the proposed reconnaissance programme;

(d) an estimate of the expenditure to be incurred, which must include costs pertaining to the rehabilitation and management of environmental impacts; and

(e) the programme for the marketing and sale of any data and conditions relating thereto which shall be limited to a maximum period of 10 years.

(2) The reconnaissance work programme contemplated in subregulation (1) shall form part of the reconnaissance permit where such permit is granted.

Report in respect of reconnaissance activities

21. (1) A holder of a reconnaissance permit must submit progress reports to the designated agency, detailing progress achieved as described in the reconnaissance work programme.

(2) A progress report contemplated in subregulation (1) must be submitted 12 months from the date of issuing of a reconnaissance permit, or at the end of the period of the reconnaissance permit if the period of reconnaissance activities is less than 12 months.

Supply of data in respect of reconnaissance

22. A holder of a reconnaissance permit must supply to the designated agency, in a format and medium as agreed upon with the designated agency, digital and, where appropriate, hard copies of all data, reports and interpretations generated, as soon as possible after completion of the operations or projects.

Application for technical co-operation permit

23. (1) An application for a technical co-operation permit in terms of section 76 of the Act must be completed in the form of Form L contained in Annexure I, and must be lodged at the office of the designated agency.

(2) The application contemplated in subregulation (1) must contain:

(a) the full particulars of the applicant;

(b) in the case of a company or closed corporation, documentary proof that the applicant has obtained the necessary authority to make the application in a representative capacity on behalf of the company or closed corporation, as the case may be;

(c) a plan contemplated in regulation 2(2), showing the land, area or offshore area to which the application relates;

(d) a registered description of the area to which the application relates;

(e) a clear statement of the technical motivation;

(f) the period for which the permit is required;

(g) a technical co-operation work programme contemplated in regulation 25;

(h) documentary evidence to prove that the applicant has access to financial resources and has the technical ability to conduct the proposed technical co-operation study; and
(i) any other information, data or documentation that the Minister may require in connection with information required under paragraphs (a) to (h).

(3) The application for a technical co-operation permit must be lodged together with the application fee specified in regulation 75(2)(b).

Terms and conditions for technical co-operation permit

24. The terms and conditions of a technical co-operation permit agreed upon will be approved by the Minister.

Technical co-operation work programme

25. (1) An applicant for a technical co-operation permit must submit a technical co-operation work programme that must include -

(a) an outline of the geological, geochemical, geophysical and other work to be performed;

(b) technical data detailing the research and analysis methods to be implemented for the proposed technical co-operation work programme; and

(c) an estimate of the expenditure to be incurred.

(2) A technical co-operation work programme contemplated in subregulation (1) shall form part of the technical co-operation permit where such permit is granted.

Report in respect of technical co-operation activities

26. (1) A holder of a technical co-operation permit must submit a report to the designated agency, detailing progress achieved as described in the technical co-operation work programme.

(2) A progress report contemplated in subregulation (1) must be submitted 12 months from the date of issuing of a technical co-operation permit, or at the end of the period of the technical co-operation permit if the period is less than 12 months.

Supply of data in respect of technical co-operation activities

27. A holder of a technical co-operation permit must supply to the designated agency, in a format and medium agreed upon with the designated agency, digital and, where appropriate, hard copies of all data generated, as soon as possible after the completion of operations or projects.

Application for exploration right

28. (1) An application for an exploration right in terms of section 79 of the Act must be completed in the form of Form M contained in Annexure I, and must be lodged at the office of the designated agency.

(2) The application contemplated in subregulation (1) must contain -

(a) the full particulars of the applicant;

(b) in the case of a company or closed corporation, documentary proof that the applicant has obtained the necessary authority to make the application in a representative capacity on behalf of the company or closed corporation, as the case may be;

(c) a plan contemplated in regulation 2(2), showing the land, area or offshore area to which the application relates;

(d) a registered description of the area to which the application relates;

(e) an indication of the mineral or minerals for which the right is required;

(f) a certified copy or copies of the title deed or deeds, where applicable, in respect of the area to which the application relates;
(g) a clear statement of the technical motivation;

(h) the period for which the right is required;

(i) an exploration work programme contemplated in subregulation 30;

(j) documentary evidence to prove that -
   (i) the applicant has the financial ability or access thereto and has the technical
       ability or access thereto to conduct the proposed exploration operation
       optimally in accordance with the exploration work programme, which must be
       supported by a report from an independent assessor approved by the
       designated agency;
   (ii) the granting of the right will further the objects referred in section 2(d) and (f) of
       the Act;

(k) a list of existing rights and or permits held by the applicant to be compiled in a table
    format that indicates the region and location with regard to the land and the existing
    right or permit number for mineral or minerals; and

(l) any other information, data or documentation that the Minister may require in
    connection with information required under paragraphs (a) to (k).

(2) The application must be lodged together with the application fee specified in regulation
    75(2)(c).

Terms and conditions for exploration right

29. The terms and conditions of an exploration right agreed upon will be approved by the Minister.

Exploration work programme

30. (1) An exploration work programme must contain -

   (a) the full particulars of the applicant;

   (b) a plan contemplated in regulation 2(2), showing the area to which the application
       relates;

   (c) a registered description of the area to which the application relates;

   (d) the mineral or minerals to be explored;

   (e) the period for which the right is required;

   (f) an outline of the geological, geochemical, geophysical, exploration drilling and
       other work to be performed;

   (g) technical data detailing the exploration method or methods to be implemented
       and the time required for each stage of the proposed exploration operation;

   (h) an estimate of the expenditure to be incurred for each stage of the exploration
       operation where the expenditure must be broken down into -
       (i) exploration costs; and
       (ii) costs pertaining to the rehabilitation and management of environmental
            impacts.

(2) The exploration work programme contemplated in subregulation (1) shall form part of the
    exploration right where such right is granted.

(3) In the case where an old order prospecting right must be converted into a new exploration
    right, the following information must, in addition to that required in terms of item 6 of
    Schedule II to the Act and to that required in terms of regulations 28 and 30, also be
    included -

   (a) a brief summary of the geology of the exploration target with a compilation of the
       data and conclusions generated under the old order prospecting right;
(b) a description of the contractual work commitment and exploration work carried out and conclusions reached, which must include -
   (i) past geological results as are outlined for the progress report;
   (ii) details of past expenditure broken down into exploration costs, manpower costs and costs pertaining to the rehabilitation and management of environmental impacts;
   (iii) data previously compiled but not yet provided to the designated agency; and
   (iv) a statement reflecting rehabilitation work completed and the rehabilitation work uncompleted.

Reports in respect of exploration

31. (1) A holder of an exploration right must submit timeous accurate progress reports to the designated agency on a monthly, quarterly and annual basis.

   (2) Monthly progress reports must be submitted within 7 days of month-end.

   (3) Quarterly progress reports must be submitted within 21 days of the end of the particular quarter of the year and must include-
      (i) the numbers of local and expatriate persons employed;
      (ii) work done and money expended on operations;
      (iii) the site and depth of every well drilled or being drilled;
      (iv) the formations penetrated and particulars regarding any occurrence of petroleum or any other mineral of potential value encountered; and
      (v) a statement reflecting rehabilitation work completed and the rehabilitation work uncompleted.

   (4) Annual progress reports must be submitted within 60 days of calendar year end and must include -
      (i) a full report of the exploration operations carried out during the year;
      (ii) a detailed statement of exploration expenditure incurred during the year;
      (iii) a description of operations planned for the following year;
      (iv) a budget for exploration operations planned for the following year; and
      (v) a statement reflecting rehabilitation work completed and rehabilitation work uncompleted.

Supply of data in respect of exploration

32. A holder of an exploration right must supply to the designated agency in a format and medium agreed upon with the designated agency, samples, digital and where appropriate, hard copies of all data generated, as soon as possible after the completion of the exploration operations.

Application for renewal of exploration right

33. (1) An application for the renewal of an exploration right in terms of section 81 of the Act must be completed in the form of Form M contained in Annexure I, and must be lodged at the office of the designated agency.

   (2) The application contemplated in subregulation (1) must contain -
      (a) the full particulars of the applicant;
      (b) a plan contemplated in regulation 2(2), showing the exploration area in question;
      (c) the mineral or minerals for which the renewal of the exploration right is required;
      (d) the period for which the renewal is required, together with any possible further renewal periods;
      (e) reasons why a renewal is required;
      (f) a detailed report reflecting the exploration results, the interpretation thereof and the exploration expenditure incurred;
(g) a report reflecting the extent of compliance with the requirements of the approved environmental management plan, the rehabilitation to be completed and the estimated cost thereof;

(h) an exploration work programme contemplated in regulation 30 for the renewal period; and

(i) any other information or documentation that the designated agency or the Minister may require in connection with information required under paragraph (a) to (h).

(2) The application for the renewal of an exploration right must be lodged together with the application fee specified in regulation 75(2)(c).

Application for production right

34. (1) An application for a production right in terms of section 83 of the Act must be completed in the form of Form N contained in Annexure I, and must be lodged at the office of the designated agency.

(2) The application contemplated in subregulation (1) must include -

(a) the full particulars of the applicant;

(b) in the case of a company or closed corporation, documentary proof that the applicant has obtained the necessary authority to make the application in a representative capacity on behalf of the company or closed corporation, as the case may be;

(c) a plan contemplated in regulation 2(2), showing the land, area or offshore area to which the application relates;

(d) details of the petroleum types and the quantity thereof, which the applicant intends to remove and dispose of during production operations;

(e) a clear statement of the technical motivation;

(f) the period for which the right is required;

(g) a registered description of the land to which the application relates;

(h) a production work programme contemplated in regulation 36;

(i) certified copy or copies of the title deed or deeds, where applicable, in respect of the land to which the application relates;

(j) a social and labour plan contemplated in regulation 46;

(k) documentary evidence to prove that -

(i) the applicant has the financial ability or access thereto and has the technical ability or access thereto to conduct the proposed production operation optimally, which must be supported by a report from an independent assessor approved by the designated agency;

(ii) the applicant has the ability to comply with the relevant provisions of the Mine Health and Safety Act, 1996 (Act No. 29 of 1996);

(iii) the granting of such right will further the object referred to in section 2(d) and (f) of the Act;

(l) a list of existing rights and or permits held by the applicant to be compiled in a table format that indicates the region and location with regard to the land and the existing right or permit number for mineral or minerals; and

(m) any other information, data or documentation that the designated agency or the Minister may require in connection with information required under paragraphs (a) to (l).

(3) An application for a production right must be lodged together with the application fee specified in regulation 75(2)(d).
Terms and conditions for production right

35. The terms and conditions of a production right agreed upon will be approved by the Minister.

Production work programme

36. (1) A production work programme must contain:

(a) the full particulars of the applicant;

(b) a plan contemplated in regulation 2(2), showing the land to which the application relates;

(c) a registered description of the land to which the application relates;

(d) the type of petroleum to be produced;

(e) a comprehensive feasibility study including details of the measured petroleum resource;

(f) technical data detailing the production method to be used;

(g) details in respect of the envisaged production rate, processing, and marketing arrangements;

(h) a financing plan that must contain –
   (i) the details and costing of the production technique, technology and production rates applicable to the proposed production operation;
   (ii) the details and costing of the technological process applicable to the extraction or preparation of the petroleum to comply with market requirements;
   (iii) the details and costing of the technical skills, expertise and associated labour implications required to conduct the proposed production operation;
   (iv) the details and costing of regulatory requirements in terms of the Act and other applicable law, relevant to the proposed production operation;
   (v) the details regarding other relevant costing, capital expenditure requirements, and expected revenue applicable to the proposed production operation;
   (vi) a detailed cash flow forecast and valuation, excluding financing of the proposed production operation, which forecast must clearly indicate how the applicable regulatory costs will be accommodated therein;
   (vii) the details regarding the applicant's financial resources or proposed mechanisms to finance the proposed production operation, and the details regarding the impact of such financing arrangements on the cash flow forecast; and
   (viii) provision for the execution of the social and labour plan; and

(i) an assessment of the reserves carried out by a competent person approved by the designated agency or the Minister; and

(j) an assessment of the development programme carried out by a competent person approved by the designated agency or Minister.

(2) The production work programme contemplated in subregulation (1) forms part of the production right where such right is granted.

(3) In the case where a holder of an OP28 mining lease wishes to convert the lease into a production right, the holder must, in addition to the information required in terms of item 5 of Schedule II to the Act and required in terms of regulations 34 and 36 include the following information:

(a) A brief history of the production area and operations, as well as an explanation of activities undertaken;

(b) a schedule of reserves and resources classified in terms of the classification rules of the Society of Petroleum Engineers as from the date of conversion;
(c) annualised figures for past expenditure broken down into development costs, production costs and costs pertaining to the rehabilitation and management of environmental impacts;

(d) copies of production reports reflecting relevant data;

(e) data previously compiled but not yet provided to the designated agency; and

(f) a statement reflecting completed rehabilitation work and uncompleted rehabilitation work.

(3) An undertaking, signed by the applicant, to adhere to the proposals set out in the production work programme.

Supply of data in respect of production

37. (1) A holder of an production right must supply to the designated agency in a format and medium agreed upon with the designated agency, samples, digital and, where appropriate, hard copies of all data generated, as soon as possible, after the completion of the production operation.

Application for renewal of production right

38. (1) An application for the renewal of a production right in terms of section 85(1) of the Act must be completed in the form of Form N contained in Annexure I, and must be lodged at the office of the designated agency.

(2) The application for a renewal of a production right must be lodged together with the application fee specified in regulation 75(2)(d).

Regional Mining Development and Environmental Committees

39. (1) A Regional Mining Development and Environmental Committee contemplated in section 64(1) of the Act, must be established by the Board for each region contemplated in section 7 of the Act within 30 days after the Act takes effect.

(2) The composition of a Regional Mining Development and Environmental Committee must ensure competency and expertise in minerals and mining development, petroleum exploration and production, social and labour issues pertaining to the Act and mining environmental management.

(3) A Regional Mining Development and Environmental Committee must consist of not more than 14 members appointed by the Board and approved by the Minister and shall include—

(a) the Regional Manager or Chief Executive of the designated agency, as the case may be, as the Chairperson;

(b) the Principal Inspector of Mines for that Region; and

(c) representatives of relevant Government departments within the national, provincial or local sphere of government or relevant organs of state within each sphere.

(4) The Board may appoint a representative from any relevant parastatal organisation or a consultant from time to time: Provided that such representatives shall have no right to vote at any meeting of the Regional Mining Development and Environmental Committee.

PART II: SOCIAL AND LABOUR PLAN

Application of provisions

40. (1) For the purposes of this Part, the provisions of regulations 41, 42, 43, 44, 45, 46 apply, with the necessary changes, to petroleum exploration and production.
(2) Any reference in the provisions referred to in subregulation (1) to -
(a) old order mining right, must be construed as a reference to old order production right;
(b) mine, must be construed as a reference to production operation;
(c) mining industry, must be construed as a reference to petroleum exploration and production industry;
(d) mining operation, must be construed as a reference to production operation;
(e) mining rights, must be construed as a reference to production rights; and
(f) Regional Manager, must be construed as a reference to designated agency.

Objectives of social and labour plan

41. The objectives of the social and labour plan are to -
(a) promote employment and advance the social and economic welfare of all South Africans;
(b) contribute to the transformation of the mining industry; and
(c) ensure that holders of mining rights contribute towards the socio-economic development of the areas in which they are operating.

Submission of social and labour plan

42. (1) (a) An application for a mining right must be accompanied by a social and labour plan contemplated in regulation 46.
(b) The Regional Manager may refer the said social and labour plan back to the applicant with proposals for amendments and the revised social and labour plan must then be re-lodged within a period specified by the Regional Manager.

(2) (a) An application for the conversion of an old order mining right in terms of the Act must be accompanied by a social and labour plan contemplated in regulation 46.
(b) The Regional Manager may refer the said social and labour plan back to the applicant with proposals for amendments and the revised social and labour plan must then be re-lodged within a period specified by the Regional Manager.

Applicability of social and labour plan

43. A social and labour plan lodged with the Regional Manager is valid until a closure certificate has been issued in terms of section 43 of the Act.

Amendment of social and labour plan

44. A social and labour plan may not be amended or varied without the consent of the Minister after the granting of the mining right to which such social and labour plan pertains.

Reporting of social and labour plan

45. The holder of a mining right must submit an annual report on the compliance with the social and labour plan to the relevant Regional Manager.

Contents of social and labour plan

46. The contents of a social and labour plan must include the following:
(a) A preamble which provides background information of the mine in question;
(b) a human resources development programme which must include-
   (i) a skills development plan which identifies and reports on -
       (aa) the number and education levels of the employees which must be
            completed in the form of Form Q contained in Annexure II; and
       (bb) the number of vacancies that the mining operation has been unable
            to fill for a period longer than 12 months despite concerted effort to
            recruit suitable candidates which must be completed in the form of
            Form R contained in Annexure II;
   (ii) a career progression plan and its implementation in line with the skills
        development plan;
   (iii) a mentorship plan and its implementation in line with the skills
        development plan and the needs for the empowerment groups;
   (iv) an internship and bursary plan and its implementation in line with the skills
        development plan; and
   (v) the employment equity statistics which must be completed in the form of
        Form S contained in Annexure II and the mine's plan to achieve the 10% 
        women participation in mining and 40% historically disadvantaged South 
        Africans (HDSA) participation in management within 5 years from the 
        granting of the right or the conversion of the old order right.

(c) A local economic development programme which must include-
   (i) the social and economic background of the area in which the mine operates;
   (ii) the key economic activities of the area in which the mine operates;
   (iii) the impact that the mine would have in the local and sending communities;
   (iv) the infrastructure and poverty eradication projects that the mine would
        support in line with the Integrated Development Plan of the areas in which
        the mine operates and the major sending areas;
   (v) the measures to address the housing and living conditions of the mine 
        employees;
   (vi) the measures to address the nutrition of the mine employees; and
   (vii) the procurement progression plan and its implementation for HDSA 
        companies in terms of capital goods, services and consumables and the 
        breakdown of the procurement which must be completed in the form of Form 
        T contained in Annexure II.

(d) processes pertaining to management of downscaling and retrenchment which must
   include-
   (i) the establishment of the future forum;
   (ii) mechanisms to save jobs and avoid job losses and a decline in employment;
   (iii) mechanisms to provide alternative solutions and procedures for creating job 
        security where job losses cannot be avoided; and
   (iv) mechanisms to ameliorate the social and economic impact on individuals,
        regions and economies where retrenchment or closure of the mine is certain.

(e) to provide financially for the implementation of the social and labour plan in terms of
    the implementation of -
    (i) the human resource development programme;
    (ii) the local economic development programmes; and
    (iii) the processes to manage downscaling and retrenchment.

(f) an undertaking by the holder of the mining right to ensure compliance with the social 
    and labour plan and to make it known to the employees.

PART III: ENVIRONMENTAL REGULATIONS FOR MINERAL DEVELOPMENT, PETROLEUM
EXPLORATION AND PRODUCTION

Application of provisions

47. (1) For purposes of this Part, the provisions of regulations 48, 49, 50, 51, 52, 53, 54, 55,
      56, 57, 58, 59, 60, 61 and 62 shall apply, with the necessary changes, to petroleum 
      exploration and production.

   (2) Any reference in the provisions referred to in subregulation (1) to-

   (a) Director-General, must be construed as a reference to designated agency;
(b) mining, must be construed as a reference to production;
(c) mining operation, must be construed as a reference to production operation;
(d) mining right, must be construed as a reference to production right;
(e) prospecting, must be construed as a reference to exploration;
(f) prospecting right, must be construed as a reference to exploration right;
(g) reconnaissance permit, must be construed as a reference to reconnaissance permit; and
(h) Regional Manager, must be construed as a reference to designated agency.

Environmental reports to be compiled for application of mining right

48. (1) An environmental impact assessment contemplated in section 39(1) of the Act is a process which results in the compilation of -

(a) a scoping report contemplated in regulation 49; and
(b) followed by an environmental impact assessment report contemplated in regulation 50.

Contents of scoping report

49. (1) A scoping report, in relation to a proposed mining operation, must-

(a) describe the methodology applied to conduct scoping;
(b) describe the existing status of the environment prior to the mining operation;
(c) identify and describe the anticipated environmental, social and cultural impacts, including the cumulative effects, where applicable;
(d) identify and describe reasonable land use or development alternatives to the proposed operation, alternative means of carrying out the proposed operation and the consequences of not proceeding with the proposed operation;
(e) describe the most appropriate procedure to plan and develop the proposed mining operation;
(f) describe the process of engagement of identified interested and affected persons, including their views and concerns; and
(g) describe the nature and extent of further investigations required in the environmental impact assessment report.

(2) The scoping report must be submitted to the office of the Regional Manager where the application was lodged, within 30 days from the date of the notification contemplated in section 39(1) of the Act.

(3) The Regional Manager must evaluate the scoping report and request the relevant Government departments and organs of State, as the case may be, to submit written comments on the scoping report within 30 days from the date of the request.

(4) The Regional Manager may request the applicant to forward specific and additional information or to conduct further investigations regarding the scoping report submitted in terms of subregulation (2).

(5) The Regional Manager must collate and forward all comments contemplated in subregulation (3) to the applicant who must address and incorporate such comments in the environmental impact assessment report and environmental management programme.
(6) The applicant contemplated in subregulation (5) must compile the environmental management programme based on the environmental impact assessment report.

Contents of environmental impact assessment report

50. The contents of an environmental impact assessment report must include the following:

(a) An assessment of the environment likely to be affected by the proposed mining operation, including cumulative environmental impacts;

(b) an assessment of the environment likely to be affected by the identified alternative land use or developments, including cumulative environmental impacts;

(c) an assessment of the nature, extent, duration, probability and significance of the identified potential environmental, social and cultural impacts of the proposed mining operation, including the cumulative environmental impacts;

(d) a comparative assessment of the identified land use and development alternatives and their potential environmental, social and cultural impacts;

(e) determine the appropriate mitigatory measures for each significant impact of the proposed mining operation;

(f) details of the engagement process of interested and affected persons followed during the course of the assessment and an indication of how the issues raised by interested and affected persons have been addressed;

(g) identify knowledge gaps and report on the adequacy of predictive methods, underlying assumptions and uncertainties encountered in compiling the required information;

(h) description of the arrangements for monitoring and management of environmental impacts; and

(i) inclusion of technical and supporting information as appendices, if any.

Environmental management programme

51. An environmental management programme contemplated in section 39(1) of the Act must include the following:

(a) A description of the environmental objectives and specific goals for-
(i) mine closure;
(ii) the management of identified environmental impacts emanating from the proposed mining operation;
(iii) the socio-economic conditions as identified in the social and labour plan; and
(iv) historical and cultural aspects, if applicable;

(b) an outline of the implementation programme which must include —
(i) a description of the appropriate technical and management options chosen for each environmental impact, socio-economic condition and historical and cultural aspects for each phase of the mining operation;
(ii) action plans to achieve the objectives and specific goals contemplated in paragraph (a) which must include a time schedule of actions to be undertaken to implement mitigatory measures for the prevention, management and remediation of each environmental impact, socio-economic condition and historical and cultural aspects for each phase of the mining operation;
(iii) procedures for environmental related emergencies and remediation;
(iv) planned monitoring and environmental management programme performance assessment;
(v) financial provision in relation to the execution of the environmental management programme which must include—
(aa) the determination of the quantum of the financial provision contemplated in regulation 54; and
(bb) details of the method providing for financial provision contemplated in regulation 53;
(vi) an environmental awareness plan contemplated in section 39(3)(c) of the Act;
(vii) all supporting information and specialist reports that must be attached as appendices to the environmental management programme; and
(viii) an undertaking by the applicant to comply with the provisions of the Act and regulations thereto.

Environmental management plan

52. (1) An applicant who's application for a prospecting right or mining permit was accepted in terms of the Act, must submit an environmental management plan at the office of the Regional Manager in whose region the application was lodged within 60 days from the date of notification by the Regional Manager.

(2) An environmental management plan, must substantially be in the standard format provided by the Department and must contain-

(a) a description of the environment likely to be affected by the proposed prospecting or mining operation;
(b) an assessment of the potential impacts of the proposed prospecting or mining operation on the environment, socio-economic conditions and cultural heritage, if any,
(c) a summary of the assessment of the significance of the potential impacts, and the proposed mitigation and management measures to minimise adverse impacts and benefits;
(d) financial provision which must include-
   (i) the determination of the quantum of the financial provision contemplated in regulation 54; and
   (ii) details of the method providing for the financial provision contemplated in regulation 53;
(e) planned monitoring and performance assessment of the environmental management plan;
(f) closure and environmental objectives;
(g) a record of the public participation undertaken and the results thereof; and
(h) an undertaking by the applicant regarding the execution of the environmental management plan.

Methods for financial provision

53. (1) Financial provision required in terms of section 41 of the Act to achieve the total quantum for the rehabilitation, management and remediation of negative environmental impacts must be provided for by one or more of the following methods:

(a) An approved contribution to a trust fund as required in terms of section 10(1)(c)(i) of the Income Tax Act, 1962 (Act No. 58 of 1962) and must be in the format as approved by the Director-General from time to time;
(b) a financial guarantee from a South African registered bank or any other bank or financial institution approved by the Director-General guaranteeing the financial provision relating to the environmental management programme or plan in the format as approved by the Director-General from time to time;
(c) a deposit into the account specified by the Director-General in the format as approved by the Director-General from time to time; or
(d) any other method as the Director-General may determine.
(2) In the case of subregulation (1)(c), proof of payment must be submitted to the office of the relevant Regional Manager prior to the approval of the environmental management plan or environmental management programme, as the case may be.

Quantum of financial provision

54. (1) The quantum of the financial provision as determined in a guideline document published by the Department from time to time, include a detailed itemization of all actual costs required for-

(a) premature closure regarding-
   (i) the rehabilitation of the surface of the area;
   (ii) the prevention and management of pollution of the atmosphere; and
   (iii) the prevention and management of pollution of water and the soil; and
   (iv) the prevention of leakage of water and minerals between subsurface formations and the surface.

(b) decommissioning and final closure of the operation; and

(c) post closure management of residual and latent environmental impacts.

(2) The holder of a prospecting right, mining right or mining permit must annually update and review the quantum of the financial provision -

(a) in consultation with a competent person;

(b) as required in terms of the approved environmental management programme or environmental management plan; or

(c) as requested by the Minister.

(3) Any inadequacies with regard to the financial provision must be rectified by the holder of a prospecting right, mining right or mining permit -

(a) in an amendment of the environmental management programme or environmental management plan, as the case may be;

(b) within the timeframe provided for; or

(c) as determined by the Minister.

Monitoring and performance assessments of environmental management programme or environmental management plan

55. (1) As part of the general terms and conditions for a prospecting right, mining right or mining permit and in order to ensure compliance with an environmental management programme or environmental management plan and to assess the continued appropriateness and adequacy of the environmental management programme or environmental management plan, a holder of such permit or right must-

(a) conduct monitoring on a continuous basis;

(b) conduct performance assessments of the environmental management plan or environmental management programme as required; and

(c) compile and submit a performance assessment report to the Minister in which compliance with paragraph (b) is demonstrated.

(2) The frequency of performance assessment reporting shall be-

(a) in accordance with the period specified in the approved environmental management programme or plan; or

(b) every two years; or
(c) as agreed to in writing by the Minister.

(3) A performance assessment report contemplated in subregulation (1)(c), shall be in the format provided in guidelines that will from time to time be published by the Department and shall as a minimum contain the following:

(a) Information regarding the period applicable to the performance assessment;

(b) the scope of the assessment;

(c) the procedure used for the assessment;

(d) the interpreted information gained from monitoring the approved environmental management programme or environmental management plan;

(e) the evaluation criteria used during the assessment;

(f) the results of the assessment; and

(g) recommendations on how and when non-compliance and deficiencies will be rectified.

(4) A holder of a prospecting right, mining right or mining permit may appoint an independent competent person(s) to conduct a performance assessment and compile a performance assessment report: Provided that such appointment shall not exonerate the holder of the responsibilities in terms of these regulations.

(5) Subject to section 30(2) of the Act, the performance assessment report submitted by the holder may be disclosed by the Minister to any person on request.

(6) If upon consideration by the Minister, the performance assessment executed by the holder of a prospecting right, mining right or mining permit is not satisfactory or the performance assessment report submitted by the holder is found to be unacceptable, the holder must-

(a) repeat the whole or relevant parts of the performance assessment and revise and resubmit the report;

(b) submit relevant supporting information;

(c) appoint an independent competent person(s) to conduct the whole or part of the performance assessment and to compile the report.

(7) If a reasonable assessment indicates that the performance assessment cannot be executed satisfactorily by a holder of a prospecting right, mining right or mining permit or a competent person(s) appointed by the holder, the Minister may appoint an independent competent person(s) to conduct such performance assessment and such appointment and execution shall be for the cost of the holder.

(8) When the holder of a prospecting right, mining right or mining permit intends closing an operation, a final performance assessment must be conducted and a report submitted to the Minister to ensure the following -

(a) the requirements of the relevant legislation have been complied with;

(b) the closure objectives as described in the environmental management programme or environmental management plan have been met; and

(c) all residual environmental impacts resulting from the holder’s operations have been identified and the risks of latent impacts which may occur have been identified, quantified and arrangements for the management thereof have been assessed.

(9) A final performance assessment report must either precede or accompany an application for a closure certificate in terms of the Act.
Principles for mine closure

56. In accordance with applicable legislative requirements for mine closure, the holder of a prospecting right, mining right, retention permit or mining permit must ensure that –

(a) the closure of a prospecting or mining operation incorporates a process which must start at the commencement of the operation and continue throughout the life of the operation;

(b) risks pertaining to environmental impacts must be quantified and managed pro-actively, which includes the gathering of relevant information throughout the life of a prospecting or mining operation;

(c) the safety and health requirements in terms of the Mine Health and Safety Act, 1996 (Act No. 29 of 1996) are complied with;

(d) residual and possible latent environmental impacts are identified and quantified;

(e) the land is rehabilitated, as far as is practicable, to its natural state, or to a predetermined and agreed standard or land use which conforms with the concept of sustainable development; and

(f) prospecting or mining operations are closed efficiently and cost effectively.

Application for closure certificate

57. (1) An application for a closure certificate by the holder of a prospecting right, mining right, retention permit or mining permit in terms of section 43(4) of the Act must be completed in the form of Form P, contained in Annexure II.

(2) The application referred to in subregulation (1) must be accompanied by the following documentation –

(a) a closure plan contemplated in regulation 62;

(b) an environmental risk report contemplated in regulation 80;

(c) a final performance assessment report contemplated in regulation 55(9); and

(d) a completed application form contemplated in regulation 58(1) to transfer environmental liabilities and responsibilities, if the transfer of such liabilities have been applied for.

Application to transfer environmental liabilities to competent person

58. (1) An application to transfer environmental liabilities to a competent person must be completed in the form of Form O contained in Annexure II and must be lodged with the Minister for consideration.

(2) The Minister may transfer liabilities and responsibilities as identified in the environmental management plan or the environmental management programme and the required closure plan to a competent person contemplated in regulation 59.

(3) When considering the transfer of environmental liabilities and responsibilities, the Minister may consult with relevant Government departments or organs of State which administers any law relating to matters affecting the environment.

Qualifications of person regarding transfer of environmental liabilities and responsibilities

59. For the purposes of transferring environmental liabilities and responsibilities as may be identified in the environmental management plan or the environmental management programme and any closure plan, the person to whom such transfer is made must –

(a) have the expertise, resources and organisational abilities to integrate risk assessment, risk management and risk financing to ascertain the cost of environmental management;
(b) have the expertise, financial and other resources to meet his or her obligations to carry out actions necessary to fulfil the environmental obligations as set out in the environmental management plan or the environmental management programme or any closure plan concerned;

(c) have appropriate experience in environmental management, prospecting or mining operations and mine health and safety matters;

(d) have direct access to insurance products and alternative risk financing services appropriate to financing of exposure to risks;

(e) have the ability to manage trusts set up in terms of section 10(1)(cH) of the Income Tax Act, 1962 (Act No 58 of 1962); and

(f) have expertise and experience or proven access thereto to interpret and manage the findings of an environmental risk assessment.

Environmental risk report

60. An application for a closure certificate must be accompanied by an environmental risk report that must include-

(a) the undertaking of a screening level environmental risk assessment where-

(i) all possible environmental risks are identified, including those which appear to be insignificant;

(ii) the process is based on the input from existing data;

(iii) the risks that are considered are qualitatively ranked as –

(aa) a potential significant risk;

(bb) a uncertain risk;

(cc) an insignificant risk;

(b) the undertaking of a second level risk assessment on issues classified as potential significant risks where-

(i) appropriate sampling, data collection and monitoring be carried out;

(ii) more realistic assumptions and actual measurements be made; and

(iii) a more quantitative risk assessment is undertaken, again classifying risks as posing a potential significant risk or insignificant risk.

(c) an assessment of whether risks classified as posing potential significant risks are acceptable without further mitigation;

(d) risks classified as uncertain risks be re-evaluated and re-classified as either posing potential significant risks or insignificant risks;

(e) documenting the status of insignificant risks;

(f) identifying alternative risk prevention or management strategies for potential significant risks that have been identified, quantified and qualified in the second level risk assessment; and

(g) agreeing on management measures to be implemented for the potential significant risks that must include-

(i) a description of the management measures to be applied;

(ii) a predicted long-term result of the applied management measures;

(iii) the residual and latent impact after successful implementation of the management measures;

(iv) time frames and schedule for the implementation of the management measures;

(v) responsibilities for implementation and long-term maintenance of the management measures;

(vi) financial provision for long-term maintenance; and

(vi) monitoring programmes to be implemented.

Closure objectives

61. Closure objectives form part of the draft environmental management programme or environmental management plan, as the case may be, and must –
(a) identify the key objectives for mine closure to guide the project design, development and management of environmental impacts;

(b) provide broad future land use objective(s) for the site; and

(c) provide proposed closure costs.

Contents of closure plan

62. A closure plan contemplated in section 43(3)(d) of the Act, forms part of the environmental management programme or environmental management plan, as the case may be, and must include –

(a) a description of the closure objectives and how these relate to the prospecting or mine operation and its environmental and social setting;

(b) a plan contemplated in regulation 2(2), showing the land or area under closure;

(c) a summary of the regulatory requirements and conditions for closure negotiated and documented in the environmental management programme or environmental management plan, as the case may be;

(d) a summary of the results of the environmental risk report and details of identified residual and latent impacts;

(e) a summary of the results of progressive rehabilitation undertaken;

(f) a description of the methods to decommission each prospecting or mining component and the mitigation or management strategy proposed to avoid, minimize and manage residual or latent impacts;

(g) details of any long-term management and maintenance expected;

(h) details of a proposed closure cost and financial provision for monitoring, maintenance and post closure management;

(i) a sketch plan drawn on an appropriate scale describing the final and future land use proposal and arrangements for the site;

(j) a record of interested and affected persons consulted; and

(k) technical appendices, if any.

PART IV: POLLUTION CONTROL AND WASTE MANAGEMENT REGULATION

Principles of pollution control and waste management

63. In accordance with applicable legislative requirements for pollution control and waste management, a holder of a mining right, prospecting right or mining permit in terms of the Act must -

(a) avoid the generation and production of pollution, waste and mine residue at source; or

(b) where the generation and production of pollution, waste and mine residue cannot altogether be avoided, it must be minimized, re-used or recycled; or

(c) where possible, dispose pollution, waste and mine residue in a responsible and sustainable manner.

Air quality management and control

64. (1) A holder of a right or permit in terms of the Act, must comply with the provisions of the Mine Health and Safety Act, 1996 (Act No. 29 of 1996), as well as other applicable law regarding air quality management and control.
(2) The assessment of impacts relating to air quality control and management, where appropriate, must form part of the environmental impact assessment report and environmental management programme or the environmental management plan, as the case may be.

Fire prevention

65. (1) All coal debris and bituminous rock must be deposited in compliance with the provisions of the Mine Health and Safety Act, 1996 (Act No. 29 of 1996) at a site as identified and approved in the environmental management programme or environmental management plan.

(2) A holder of a mining right pertaining to the mining of coal shall be responsible for all damages resulting from the combustion of the coal residue stockpiles or deposits.

Noise management and control

66. (1) A holder of a right or permit in terms of the Act must comply with the provisions of the Mine Health and Safety Act, 1996 (Act No. 29 of 1996), as well as other applicable law regarding noise management and control.

(2) The assessment of impacts relating to noise pollution management and control, where appropriate, must form part of the environmental impact assessment report and environmental management programme or the environmental management plan, as the case may be.

Blasting, vibration and shock management and control

67. (1) A holder of a right or permit in terms of the Act must comply with the provisions of the Mine Health and Safety Act, 1996, (Act No. 29 of 1996), as well as other applicable law regarding blasting, vibration and shock management and control.

(2) An assessment of impacts relating to blasting, vibration and shock management and control, where applicable, must form part of the environmental impact assessment report and environmental management programme or the environmental management plan, as the case may be.

Water management and pollution control

68. (1) The provisions of the National Water Act, 1998 (Act No. 36 of 1998) shall apply to the water management and pollution control at all proposed or existing prospecting or mining operations.

(2) An assessment of impacts relating to water management and pollution control at proposed prospecting or mining operations, where appropriate, must form part of the environmental impact assessment report and environmental management programme or environmental management plan, as the case may be.

Disposal of waste material

69. (1) A holder of any right or permit in terms of the Act, must comply with applicable legislative requirements regarding the disposal of waste material.

(2) The assessment of impacts relating to the disposal of waste material, where appropriate, must form part of the environmental impact assessment report and environmental management programme or environmental management plan, as the case may be.

(3) Waste material from reduction works, beneficiation plants, coal preparation plants, screening and washing installations and generating stations at a mine shall be disposed of in accordance with the approved environmental management programme or environmental management plan and on an approved demarcated site.

(4) Dumping or impounding of rubble, litter, garbage, rubbish or discards of any description, whether solid or liquid, must take place only at the site or sites...
demarcated for such the purpose in accordance with the approved environmental management programme or environmental management plan.

(5) No sand dump or slimes dam shall be established on the bank of any stream, river, dam, pan, wetland or lake without written permission of the Minister in consultation with the relevant Government department and upon such conditions as he or she may determine and as approved in the environmental management programme or environmental management plan, as the case may be.

(6) Coal debris shall not be allowed to accumulate on any ground where there exist, or where there are likely to occur, surface fissures or cavities as a result of underground operations.

Soil pollution and erosion control

70. (1) A holder of a right or permit in terms of the Act, must comply with applicable legislative requirements regarding the management and control of soil pollution and erosion, where applicable.

(2) The assessment of impacts relating to soil pollution and erosion control, where appropriate, must form part of the environmental impact assessment report and environmental management programme or the environmental management plan, as the case may be.

(3) The spillage of hazardous chemicals onto soils or its escape or migration into surrounding soils from the approved depositioning area, must be prevented.

(4) Oils, grease and hydraulic fluids must be disposed of -
   (a) in a waste disposal receptacle for collection or treatment; or
   (b) at a licensed facility; or
   (c) in accordance with a method approved in the environmental management programme or environmental management plan, as the case may be.

(5) Oils, grease and hydraulic fluid spills must be cleaned up by removing all contaminated soil and disposing such soil in a waste disposal receptacle or at a licensed facility.

(6) The acidification, salination and mineralisation of soils through seepage of polluted water and the irrigation of land with any water must take place within applicable legislative requirements or as approved in the environmental management programme or environmental management plan, as the case may be.

(7) The chemical and physical properties of top soil to be used for the purposes of rehabilitation must not be changed by introducing foreign material, gravel, rock, rubble or mine residue to such soil.

Sanitation of surface

71. (1) Toilet facilities shall be located in such a manner that no water or other pollution is caused.

(2) No person shall pollute the workings with faeces or urine or misuse the facilities provided or inappropriately foul the surrounding environment with faeces or urine. Acceptable hygienic and aesthetic practices must be adhered to.

Granite off-cuts and related waste

72. Granite off-cuts and related waste must be broken into manageable units to be either recycled, crushed or disposed of and the applicable land must be rehabilitated in accordance with the identified end-land use as identified in the approved environmental management programme or environmental management plan, as the case may be.

Management of residue stockpiles and deposits

73. (1) The assessment of impacts relating to the management of residue stockpiles and deposits, where appropriate, must form part of the environmental impact assessment
report and environmental management programme or the environmental management
plan, as the case may be.

(2) (a) Mine residue must be characterised to identify any potentially significant
health or safety hazard and environmental impact that may be associated
with the residue when stockpiled or deposited at the site(s) under
consideration.

(b) Residue stockpiles and deposits must be characterised in terms of its –
(i) physical characteristics, that may include -
(aa) the size distribution of the principal constituents;
(bb) the permeability of the compacted material;
(cc) void ratios of the compacted material;
(dd) the consolidation or settling characteristics of the material under
its own weight and that of any overburden;
(ee) the strength of compacted material;
(ff) the specific gravity of the solid constituents; and
(gg) the water content of the material at the time of deposition, after
compaction, and at other phases in the life of the deposit;

(ii) chemical characteristics, that may include -
(aa) the toxicity;
(bb) the propensity to oxidize and decompose;
(cc) the propensity to undergo spontaneous combustion;
(dd) the pH and chemical composition of the water separated from
the solids;
(ee) stability and reactivity and the rate thereof; and
(ff) neutralising potential; and

(iii) mineral content, that may include the specific gravity of the residue
particles and its impact on particle segregation and consolidation.

(c) All mine residue stockpiles and deposits must be classified by a competent
person.

(3) (a) All residue stockpiles and deposits must be classified into one or a
combination of the following categories –
(i) the safety classification to differentiate between residue stockpiles and
deposits of high, medium and low hazard on the basis of their potential
to cause harm to life or property; and
(ii) the environmental classification to differentiate between residue
stockpiles and deposits with -
(aa) a potentially significant impact on the environment due to its
spatial extent, duration and intensity of potential impacts; or
(bb) no potentially significant impact on the environment.

(b) The classification of residue stockpiles and deposits shall determine the –
(i) level of investigation and assessment required;
(ii) requirements for design, construction, operation, decommissioning,
closure and post closure maintenance; and
(iii) qualifications and expertise required of persons undertaking the
investigations, assessments, design and construction thereof.

(c) The safety classification of residue stockpiles and deposits shall be based on
the criteria as indicated in the Table below –

<table>
<thead>
<tr>
<th>Number of residents in zone of influence</th>
<th>Number of workers in zone of influence</th>
<th>Value of third party property in zone of influence</th>
<th>Depth to underground mine workings</th>
<th>Classification</th>
</tr>
</thead>
<tbody>
<tr>
<td>0</td>
<td>&lt; 10</td>
<td>0 - R2 m</td>
<td>&gt; 200 m</td>
<td>Low hazard</td>
</tr>
<tr>
<td>1 - 10</td>
<td>11 - 100</td>
<td>R2 m - R20 m</td>
<td>50 m - 200 m</td>
<td>Medium hazard</td>
</tr>
<tr>
<td>&gt; 10</td>
<td>&gt; 100</td>
<td>&gt; R20 m</td>
<td>&lt; 50 m</td>
<td>High hazard</td>
</tr>
</tbody>
</table>

(d) A risk analysis must be carried out and documented on all high hazard
residue stockpiles and deposits.
(e) The environmental classification of residue stockpiles and deposits must be undertaken on the basis of –
   (i) the characteristics of the residue;
   (ii) the location and dimensions of the deposit (height, surface area);
   (iii) the importance and vulnerability of the environmental components that are at risk; and
   (iv) the spatial extent, duration and intensity of potential impacts.

(f) The assessment of impacts and analyses of risks shall form part of the environmental impact assessment and environmental management programme or environmental management plan, as the case may be.

(4) (a) The process of investigation and selection of a site for residue stockpiling and residue deposits must entail –
   (i) the identification of a sufficient number of possible candidate sites to ensure adequate consideration of alternative sites;
   (ii) qualitative evaluation and ranking of all alternative sites;
   (iii) qualitative investigation of the top ranking sites to review the ranking done in terms of subparagraph (ii);
   (iv) a feasibility study to be carried out on the highest ranking site(s), involving -
      (aa) a preliminary safety classification;
      (bb) an environmental classification;
      (cc) geotechnical investigations; and
      (dd) groundwater investigations.

(b) The geotechnical investigations may include-
   (i) the characterization of the soil profile over the entire area to be covered by the residue facility and associated infrastructure to define the spatial extent and depth of the different soil horizons; and
   (ii) the characterization of the relevant engineering properties of foundations soils and the assessment of strength and drainage characteristics.

(c) The groundwater investigations may include-
   (i) the potential rate of seepage from the residue facility;
   (ii) the quality of such seepage;
   (iii) the geohydrological properties of the strata within the zone that could potentially be affected by the quality of seepage; and
   (iv) the vulnerability and existing potential use of the groundwater resource within the zone that could potentially be affected by the residue facility.

(d) From these investigations contemplated in paragraphs (a), (b) and (c) above, a preferred site must be identified.

(e) Further investigation on the preferred site, must include –
   (i) land use;
   (ii) topography and surface drainage;
   (iii) infrastructure and man-made features;
   (iv) climate;
   (v) flora and fauna;
   (vi) soils;
   (vii) ground water morphology, flow, quality and usage; and
   (viii) surface water.

(f) The investigations, laboratory test work, interpretation of data and recommendations for the identification and selection of the most appropriate and suitable site for the disposal of all residue that has the potential to generate leachate that could have a significant impact on the environment and groundwater must be carried out by a competent person.

(5) (a) The design of the residue stockpile and deposit shall be undertaken by a competent person.

(b) An assessment of the typical soil profile on the site is required for residue stockpiles and deposits that -
(i) have a low hazard potential; and
(ii) have no significant impact on the environment.

(c) The design of the residue stockpile and deposit must take into account all phases of the life cycle of the stockpile and deposit, from construction through to closure and must include—
(i) the characteristics of the mine residue;
(ii) the characteristics of the site and the receiving environment;
(iii) the general layout of the stockpile or deposit, whether it is a natural valley, ring dyke, impoundment or a combination thereof and its three-dimensional geometry at appropriate intervals throughout the planned incremental growth of the stockpile or deposit;
(iv) the type of deposition method used; and
(v) the rate of rise of the stockpile or deposit.

(d) Other design considerations, as appropriate to the particular type of stockpile and deposit that must be incorporated include—
(i) the control of storm water on and around the residue stockpile or deposit by making provision for the maximum precipitation to be expected over a period of 24 hours with a frequency of once in a 100 years;
(ii) the provision, throughout the system, of a freeboard of at least 0.5 m above the expected maximum water level to prevent overtopping;
(iii) keeping the pool away from the walls; where there are valid technical reasons for deviating from this, adequate motivation must be provided and the design must be reviewed by a competent person;
(iv) the control of decanting of excess water under normal and storm conditions;
   (aa) the retention of polluted water in terms of polluted water in terms of GN R991(9), where measures may be required to prevent water from the residue deposit from leaving the residue management system;
   (bb) the design of the penstock, outfall pipe, under-drainage system and return water dams;
   (cc) the height of the phreatic surface, slope angles and method of construction of the outer walls and their effects on shear stability;
   (dd) the erosion of slopes by wind and water, and its control by vegetation, berms or catchment paddocks; and
   (ee) the potential for pollution.

(e) A design report and operating manual must be drawn up by a competent person for all residue stockpiles and deposits that—
(i) have a medium to high hazard; and
(ii) have a potentially significant impact on the environment.

(f) Relevant information pertaining to the management of mine residue stockpiles and deposits must be included in the environmental management programme or environmental management plan.

(6) (a) The holder of any right or permit in terms of the Act, must ensure that—
(i) the residue deposits, including any surrounding catchment paddocks, are constructed and operated in accordance with the approved environmental management programme or environmental management plan;
(ii) the design of the residue deposit is followed implicitly throughout the construction thereof, and that any deviations from the design be approved by the Regional Manager and that the environmental management programme and environmental management plan be amended accordingly;
(iii) as part of the monitoring system, measurements of all residues transported to the site and of all surplus water removed from the site are recorded;
(iv) appropriate security measures are implemented to limit unauthorised access to the site and intrusion into the residue deposit;
(v) specific action is taken in respect of any sign of pollution;
(vi) adequate measures are implemented to control dust pollution and erosion of the slopes at residue stockpiles and deposits; and
(vii) details of rehabilitation of the residue deposit are provided in the environmental management programme or environmental management plan, as the case may be.

(b) A system of routine maintenance and repair in respect of the residue deposit must be implemented to ensure the ongoing control of pollution, the integrity of rehabilitation, health and safety matters at the site.

(7) (a) A monitoring system for residue stockpiles and deposits with respect to potentially significant impacts as identified in the environmental assessment must be included in the environmental management programme or environmental management plan, as the case may be.

(b) In the design of a monitoring system for a residue stockpile or deposit, consideration must be given to—
(i) baseline and background conditions with regard to air, surface and groundwater quality;
(ii) the air, surface and groundwater quality objectives;
(iii) residue characteristics;
(iv) the degree and nature of residue containment;
(v) the receiving environment and specifically the climatic, local geological, hydrogeological and geochemical conditions;
(vi) potential migration pathways;
(vii) potential impacts of leachate;
(viii) the location of monitoring points and the monitoring protocols; and
(ix) the reporting frequency and procedures.

(8) (a) The decommissioning, closure and post closure management of residue deposits must be addressed in the closure plan, which must contain the following:
(i) The environmental classification, including assumptions on which the classification is based;
(ii) the closure objectives, final land use or capability;
(iii) conceptual description and details for closure and post-closure management;
(iv) cost estimates and financial provision for closure and post-closure management; and
(v) residual impacts, monitoring and requirements to obtain mine closure in terms of the Act.

CHAPTER 3

APPEALS

Appeal against administrative decisions

74. (1) Any person who appeals in terms of section 96 of the Act against an administrative decision, must within 30 days after he or she has become aware of the or should reasonably become aware of the administrative decision concerned, lodge a written notice of appeal with the Director-General or the Minister, as the case may be.

(2) The notice of appeal must state clearly—
(a) the actions appealed against; and
(b) the grounds on which the appeal is based.

(3) The appeal fee specified in regulation 76(1)(f) must accompany a notice of appeal.

(4) The Director-General or the Minister, as the case may be, may in his or her discretion and on such terms and conditions as he or she may decide, condone the late noting of an appeal.
(5) After receipt of the notice of appeal, the Director-General or the Minister, as the case may be, must -

(a) dispatch copies thereof to –

(i) the person responsible for the administrative decision concerned;

(ii) any other person, whose rights may, in the opinion of the Director-General or the Minister, as the case may be, be affected by the outcome of the appeal; and

(b) request the persons contemplated in paragraph (a) to respond as provided for in subregulations (6) and (7).

(6) A person contemplated in subregulation 5(a)(i) must, within 21 days from receipt of the notice of appeal, submit to the Director-General or the Minister, as the case may be, written reasons for the administrative decision appealed against.

(7) A person contemplated in subregulation 5(b)(ii) must within 21 days from receipt of the notice of appeal, submit to the Director-General or the Minister, as the case may be, a replying submission indicating -

(a) the extent and nature of his or her rights;

(b) how the outcome of the appeal may affect his or her rights; and

(c) any other information pertaining to the grounds as set out in the notice of appeal.

(8) The Director-General or Minister, as the case may be, must dispatch the documents contemplated in subregulations (6) and (7) to the appellant by registered post and request him or her to respond thereto in writing within 21 days from receipt thereof.

(9) The Director-General or the Minister, as the case may be, must, within 30 days from the date of receipt of the response contemplated in subregulation (8), either -

(a) confirm the administrative decision concerned;

(b) set aside the administrative decision concerned;

(c) amend the administrative decision concerned; or

(d) substitute any other administrative decision for the administrative decision concerned.

(10) A notice of appeal contemplated in subregulation (1) -

(a) that is addressed to the Director-General, may be forwarded to any of the following addresses:

(i) Postal address:
Department: Minerals and Energy
Private Bag X59
PRETORIA
0001
For attention: Director, Legal Services; or

(ii) Domicilium citandi et executandi:
Department: Minerals and Energy
Mineralia Centre
Cnr of Andries and Visagie Streets
PRETORIA
For attention: Director, Legal Services; or

(b) that is addressed to the Minister, may be forwarded to any of the following addresses:
(i) Postal address:
Department: Minerals and Energy
Private Bag X59
PRETORIA
0001
For attention: Director, Legal Services; or

(ii) Domicilium citandi et executandi:
Department: Minerals and Energy
Mineralia Centre
Cnr Andries and Visagie Streets
PRETORIA
For attention: Director, Legal Services.

CHAPTER 4

GENERAL AND MISCELLANEOUS REGULATIONS

Application fees for permissions, permits, rights and appeals

75. (1) Application fees payable in terms of Chapter 4 of the Act, shall be as follows:

In relation to -

(a) a reconnaissance permission: R 100,00;
(b) a prospecting right and a renewal thereof: R 500,00;
(c) a mining right or a renewal thereof: R 1000,00;
(d) a mining permit: R 100,00;
(e) a retention permit or a renewal thereof: R 5000,00; and
(f) the lodging of an appeal: R 500,00.

(2) Application fees in respect of onshore and offshore applications payable in terms of Chapter 6 of the Act, shall be as follows:

<table>
<thead>
<tr>
<th>DESCRIPTION</th>
<th>ONSHORE (R)</th>
<th>OFFSHORE (R)</th>
</tr>
</thead>
<tbody>
<tr>
<td>(a) Reconnaissance permit</td>
<td>100,00</td>
<td>500,00</td>
</tr>
<tr>
<td>(b) Technical co-operation permit</td>
<td>100,00</td>
<td>500,00</td>
</tr>
<tr>
<td>(c) Exploration right or a renewal thereof</td>
<td>500,00</td>
<td>1000,00</td>
</tr>
<tr>
<td>(d) Production right or a renewal thereof</td>
<td>1000,00</td>
<td>5000,00</td>
</tr>
</tbody>
</table>

(3) The fees specified in this chapter shall be paid when the application or appeal concerned is lodged and shall not be refundable: Provided that the fee payable in respect of an appeal shall be returned to the applicant if his or her appeal is upheld.

Prospecting fees

76. (1) The prospecting fees or exploration fees payable as contemplated in section (19)(2)(f) and section 82(2)(e) of the Act, shall be as follows:

(a) A prospecting right or an exploration right granted in terms of section 17 or section 80 of the Act, on land other than offshore areas, the scheduled rates shall apply as categorized below:

<table>
<thead>
<tr>
<th>CATEGORY</th>
<th>A</th>
<th>B</th>
</tr>
</thead>
<tbody>
<tr>
<td>Area in hectares</td>
<td>0 - 1000</td>
<td>1001 and greater</td>
</tr>
<tr>
<td>Year</td>
<td>Fixed annual (R)</td>
<td>Rate R/hectare</td>
</tr>
<tr>
<td>1</td>
<td>1000,00</td>
<td>1.00</td>
</tr>
<tr>
<td>2</td>
<td>1100,00</td>
<td>1.50</td>
</tr>
<tr>
<td>3</td>
<td>1200.00</td>
<td>2.00</td>
</tr>
<tr>
<td>---</td>
<td>---------</td>
<td>-----</td>
</tr>
<tr>
<td>4</td>
<td>1300.00</td>
<td>2.50</td>
</tr>
<tr>
<td>5</td>
<td>1400.00</td>
<td>3.00</td>
</tr>
</tbody>
</table>

All hectares will be rounded to the nearest hectare; by rounding up if the fraction is 0.5 hectare or more, or otherwise by rounding down.

(b) The prospecting fees contemplated in subregulation (1)(a) will be revised annually.

(c) A renewal of a prospecting right or an exploration right granted in terms of section 18 or section 81 of the Act, the following scheduled rates apply as categorized below:

<table>
<thead>
<tr>
<th>CATEGORY</th>
<th>A</th>
<th>B</th>
</tr>
</thead>
<tbody>
<tr>
<td>Area in hectares</td>
<td>0 - 1000</td>
<td>1001 and greater</td>
</tr>
<tr>
<td>Year</td>
<td>Fixed annual (R)</td>
<td>Rate R/hectare</td>
</tr>
<tr>
<td>1</td>
<td>2800.00</td>
<td>5.00</td>
</tr>
<tr>
<td>2</td>
<td>2800.00</td>
<td>6.00</td>
</tr>
<tr>
<td>3</td>
<td>3000.00</td>
<td>7.00</td>
</tr>
</tbody>
</table>

(i) All hectares will be rounded to the nearest hectare; by rounding up if the fraction is 0.5 or more, or by otherwise rounding down.

(ii) In the case of an exploration right renewed for more than one period of two years as provided for in section 81(4), the renewed exploration fees will escalate at R 1,00 per annum for each subsequent renewal.

(d) A prospecting right granted offshore in terms of section 17 of the Act, excluding diamond concessions, for any mineral other than petroleum, the prospecting fee will be R 100,00 per square kilometre for the first year and thereafter escalate at a rate of R 10,00 per square kilometre per annum for the period granted.

(e) A renewal of a prospecting right granted offshore in terms of section 18 of the Act, the prospecting fee will be R 200,00 per square kilometre for the first year and thereafter escalate at a rate of R 20,00 per square kilometre per annum for the renewal period granted.

(f) An exploration right granted in terms of section 80 of the Act offshore, the exploration fee will be R200 000 per annum per degree square (about 10 000 square km), pro-rated as appropriate but with a minimum of R50 000, increased annually by the increase in the Consumer Price Index (CPI) for metropolitan areas as published by the relevant state agency.

(g) A renewal of an exploration right granted in terms of section 81 of the Act offshore, the exploration fee will be, for the first renewal, R225 000 per annum, for a second renewal period R250 000 per annum, and for a third renewal R275 000, per degree square in all cases pro-rated as appropriate but with minimums of R56 250, R 62 500 and R68 750 respectively, increased annually by the increase in the consumer Price Index (CPI) for metropolitan areas as published by the relevant state agency.

(h) A prospecting right granted in terms of section 17 of the Act for the (a), (b), (c) and (d) diamond concession areas, specified below will be as follows for the first year and thereafter escalate at a rate of 10 percent (simple interest) per annum for the duration of the prospecting right granted:

<table>
<thead>
<tr>
<th>Concession area</th>
<th>Total amount (Rand)</th>
</tr>
</thead>
<tbody>
<tr>
<td>(a)</td>
<td>5000.00</td>
</tr>
<tr>
<td>(b)</td>
<td>4000.00</td>
</tr>
<tr>
<td>(c)</td>
<td>3000.00</td>
</tr>
<tr>
<td>(d)</td>
<td>2000.00</td>
</tr>
</tbody>
</table>
For a renewal of a prospecting right granted in terms of section 18 of the Act for the (a), (b), (c) and (d) diamond concession areas, the initial rates specified in subregulation (1)(h) will double respectively for year one of the renewal period and thereafter escalate at a rate of 10 percent (simple interest) per annum for the renewal period granted.

(2) The prospecting fees or exploration fees must be paid by the holder of such right annually in advance and not later than 30 days from the commencement date of such right and thereafter not later than 30 days following the anniversary of each respective year of the prospecting right for the duration thereof.

(3) If the prospecting fees or exploration fees referred to in subregulation (2) are not paid punctually on the due dates of payment, the holder shall be in mora debitoris and shall pay interest thereon at the rate prescribed in terms of section 80 of the Public Finance Management Act, 1999 (Act No. 1 of 1999) reckoned from the day following the last day allowed for payment up to and including the day of payment.

(4) Upon the relinquishment of areas already prospected or explored, in respect of the applicable prospecting or exploration right, excluding a right granted over a diamond concession area, the prospecting or exploration fees payable may be reduced accordingly: Provided that:

(a) written notification with details of the relinquishment is submitted by the holder of the prospecting or exploration right to the regional Manager or Designated Agency, whichever is applicable, at least 90 days before payment of the annual prospecting or exploration fees becomes due; and

(b) the holder is not in mora debitoris due to late payments on any amount in respect of prospecting or exploration fees, or where any debt in respect of prospecting or exploration fees are outstanding.

(5) Where advance payments have been made and the prospecting or exploration right is abandoned, suspended or cancelled before the lapping of such right, no refunds of prospecting or exploration fees paid will be allowed.

**Retention fees**

77. The retention fees payable as contemplated in section (35)(2)(a) of the Act must be paid at the Office of the Regional Manager in whose region the retention permit was obtained and shall be as follows:

<table>
<thead>
<tr>
<th>Year</th>
<th>Rand/ha</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>5000.00</td>
</tr>
<tr>
<td>2</td>
<td>5500.00</td>
</tr>
<tr>
<td>3</td>
<td>6000.00</td>
</tr>
</tbody>
</table>

(2) The retention fees contemplated in subregulation (1) will be revised annually.

(3) For a renewal of a retention permit granted in terms of section 34(1) of the Act, the rates in subregulation (1) will double and shall be as follows:

<table>
<thead>
<tr>
<th>Year</th>
<th>Rand/ha</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>10000.00</td>
</tr>
<tr>
<td>2</td>
<td>11000.00</td>
</tr>
</tbody>
</table>

(4) The retention fees must be paid by the holder of such permit annually in advance and not later than 30 days from the commencement date of such permit and thereafter not later than 30 days following the anniversary of each respective year of the retention permit for the duration thereof.

(5) If the retention fees referred to in subregulations (1) and (3) are not paid punctually on the due dates of payment, the holder shall be in mora debitoris and shall pay interest thereon at the rate prescribed in terms of section 80 of the Public Finance Management Act, 1999 (Act No. 1 of 1999) reckoned from the day following the last day allowed for payment up to and including the day of payment.
(6) Where advance payments have been made and the retention permit is abandoned, suspended or cancelled before the lapsing date of such permit, no refunds of retention fees paid will be allowed.

CHAPTER 5

TRANSITIONAL ARRANGEMENTS

Lodgement of old order prospecting right listed in Table 1 of Schedule II of the Act for conversion

78. An application for the conversion of an old order prospecting right contemplated in item 6(1) of Schedule II of the Act, must be completed in the form of Form I contained in Annexure I.

Lodgement of old order mining right listed in Table 2 of Schedule II of the Act for conversion

79. An application for the conversion of an old order mining right contemplated in item 7(1) of Schedule II of the Act must be completed in the form of Form J contained in Annexure I.

Application of transitional arrangements to OP26 right and OP26 mining lease pertaining to petroleum exploration and production

80. The provisions of regulations 79 and 80 shall apply respectively, with the necessary changes, to the conversion of an OP26 right and OP26 mining lease.

Affidavit forms

81. The affidavits required in terms of Schedule II; items 4(2)(h), 5(2)(e), 6(2)(d) and 7(2)(d) of the Act, must be completed on the applicable Forms U, V, W and X, respectively.

Conversion fees

82. (1) The conversion fees payable to convert old order rights into -

<table>
<thead>
<tr>
<th>Description</th>
<th>Conversion fees (Rand)</th>
</tr>
</thead>
<tbody>
<tr>
<td>(a) exploration right</td>
<td>R200,00</td>
</tr>
<tr>
<td>(b) production right</td>
<td>R500,00</td>
</tr>
<tr>
<td>(c) prospecting right</td>
<td>R 200,00</td>
</tr>
<tr>
<td>(d) mining right</td>
<td>R 500,00</td>
</tr>
</tbody>
</table>

(2) The fees referred to in subregulation (1) shall be paid on the lodgement of an application for the conversion concerned and shall not be refundable.

Forms

83. The forms contained in Annexure I and Annexure II are prescribed for use under the Act.
DEPARTMENT: MINERALS AND ENERGY  
REPUBLIC OF SOUTH AFRICA  

APPLICATION FOR RECONNAISSANCE PERMISSION  
(In terms of section 13 of the Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002))  

INSTRUCTIONS:  
1. For any enquiries, contact the relevant Regional office during office hours (refer to List 1).  
2. Complete the form in block letters and in black pen.  
3. Where options are given, please mark the appropriate block.  
4. Complete the form in English and do not use abbreviations (e.g. Street not St).  
5. For the type of mineral or minerals applied for, please see List 2 attached to the form.  
6. Although the application forms are made available in electronic format, only a signed original hard copy shall be acceptable.  
7. Ensure that all the required attachments accompany the application.  
8. The application must be submitted to the relevant Regional Manager where the land or area is situated.  

MINISTER  

REGION:  

PART A: PARTICULARS OF APPLICANT  

In the case of a natural person, please provide the following:  
Surname:  
Forename(s):  
Identity number:  
*(a certified copy of the identity number in the identity document must be attached)  

In the case of a person other than a natural person, please indicate:  
Provincial Government  
Municipality  
CC.  
Co.  
Partnership/Joint venture  
Other (specify):  

Name of Provincial Government, municipality, company, closed corporation, partnership or joint venture:  

Registration number of Co. or CC.:  
Trading as (if applicable):  

In the case of a Co. or CC., attach the following:  
A certified copy of the certificate of Incorporation:  
A certified copy of the certificate to commence business:
