

**MINISTRY  
ENERGY  
REPUBLIC OF SOUTH AFRICA**

**TO ALL MEDIA**

**MINISTER OF ENERGY TO OFFICIATE AT THE LAUNCH OF THE FIRST  
AdBlue BLEND PLANT IN AFRICA**

Members of the media are invited to attend and cover the inauguration of the first Diesel Exhaust Fluid blend plant in Africa.

The inauguration of this unique blending plant is aligned to the Department of Energy's efforts to improve the quality of liquid transport fuels in the country. Two months ago, the department published the *Discussion Document on the Review of Fuel Specifications and Standards for South Africa* in the Government Gazette for public comment which paves the way towards realising this objective.

The Minister views this initiative as an indication of confidence in Government's efforts to improve the quality of our liquid fuels in the country.

The details are as follows:

**venue :**        **Blue Sky Environmental Technologies**  
                  **126 Sarelbaard Crescent, Gateway Industrial Park,**  
                  **Rooihuiskraal, Centurion**

**Time**            **12:00- 13:30**

**date**            **20 May 2011**
